For the third year in a row Oregon grape growers planted a record number of new acres. There were 1,570 new acres planted in 2008, 1,543 new acres planted in 2007, and 1,378 new acres planted in 2006. Total yield per harvested acre was down 17 percent in 2008. Growers reported a late start to the growing season coupled with various sources of fruit loss. The most frequently reported grape varieties not listed in the accompanying tables were: Grenache, Malbec, Marechal Foch, Sangiovese, and Petit Verdot.

There was a net gain of 25 wineries in Oregon during 2008 and a ten percent increase in total cooperage. Case sales of Oregon wine increased two percent and wine sales in dollars increased 15 percent. Funding for this annual survey is provided by the Oregon Wine Board.
